

*The integration of health promotion and environmental justice can produce powerful conceptual tools and strategies to ensure that all citizens share in the balance between responsible human development and environmental sustainability....*

*Yet....*

*...practitioners are working largely outside of the existing institutional boundaries and mandates of academic and governmental health promotion bodies.*

Masuda, Poland, & Baxter (2010). Reaching for environmental health justice: Canadian experiences for a comprehensive research, policy and advocacy agenda in health promotion *Health Promotion International*.
